FRONTIERS IN PRECISION MEDICINE WEBINAR SERIES

OVERVIEW
Across the world, multidisciplinary teams are leveraging genomics to rapidly change medical practice through faster diagnoses, better disease prevention, and more personalized value-driven care. This webinar series will explore local and regional efforts to accelerate the impacts of genomic medicine for everyone. Speakers will share their experiences developing new genomic technologies and implementing them in clinical applications. Throughout the series, we will highlight the ethical, legal, and social considerations required for broad uptake and equitable impact of genomic medicine.

SAVE THE DATE
October 6, 2020 / 2:00 - 3:00 PM
Joseph Grzymski, PhD
Chief Scientific Officer, Renown Health
Principal Investigator, Healthy Nevada Project

November 10, 2020 / 2:00 - 3:00 PM
Lincoln Nadauld, MD, PhD
Vice President and Chief of Precision Health, Intermountain Healthcare

December 9, 2020 / 1:00 - 2:00 PM
David Chambers, DPhil
Deputy Director for Implementation Science, National Cancer Institute

February 11, 2021 / 2:00 - 3:00 PM
Karen Miga, PhD
Assistant Research Scientist and Program Director, Human Pangenome Production Center at UCSC Genomics Institute

March 11, 2021 / 2:00 - 3:00 PM
Jada Hamilton, PhD, MPH
Assistant Attending Psychologist, Department of Psychiatry & Behavioral Sciences, Memorial Sloan Kettering Cancer Center

TOPICS WILL INCLUDE
Implementation Science
Population Health and Genomics
New Technologies
Physician/Patient Communication

Presented by the Center for Genomic Medicine
